# MANUKAPLI

100% Medical grade Manuka honey in a tube

## FEATURE

Manuka honey impregnated in dressing, with pH of 3.0-4.5  
High potency medical grade Manuka honey.  
(Leptospermum scoparium)

## FUNCTION

Reduces wound bed pH to optimize wound healing.  
Manuka honey released into wound bed with sustained flow, while exudate and necrotic tissue is absorbed into a dressing (applied separately).  
Promotes autolytic debridement.

## TYPES OF WOUNDS & APPLICATIONS FOR MANUKAPLI

**Indicated for none to scant exudate on the following wound types:**

- Venous Ulcers
- Diabetic Foot Ulcers
- Pressure Ulcers
- Arterial & Surgical Wounds
